## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 7-81604 in view of JP 11-144185 and JP 2001-76128.

The JP reference '604 discloses a vehicle equipped with a automatic steering system that uses a CCD camera to capture points in time as images to convert them into coordinate values to indicate the location of the lanes of traffic as described in paragraphs 8, 12-14, 28 and 58. The JP '185 reference discloses an automatic steering system that calculates an immediate future route that the vehicle needs to travel to continue running safely in the lane without hitting any other vehicles. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of JP '604 with the safe running calculation of JP '185 in order to have less accidents. The JP ' 128 discloses representing a road from a zone that is not found on the road and filled with traffic obstacles by comprehending associated texture data. It uses a stereo camera for capturing 3D data. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified device of JP '604 with a 3D camera and zone detection as taught by JP '128 in order to have better resolution.
